Weekly Coal Production

Energy Information Administration
Washington, D C

Production for Week Ended:
December 28, 1985

Highlights

U.S. coal production in the week ended December 28, 1985, as estimated by the Energy Information Administration, totaled 11.08 million short tons (bituminous coal and lignite, 11.02 million short tons; Pennsylvania anthracite, .05 million short tons). This was 37.1 percent lower than the previous week, and was 9.2 percent higher than production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through December 28,

1985 was estimated at 879.52 million short tons, 1.6 percent below the 893.64 million short tons produced in the comparable period in 1984. The cumulative 1985 production figure includes revisions to third quarter weekly estimates. Revised monthly coal production figures for the third quarter of 1985 will be published in this report during January.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
